

INFORMATION SECURITY MANAGEMENT SYSTEM POLICY

Scope and applicability:

The Policy is applicable to renewable power generation business processes for all the assets of SPRNG Energy (Wind & Solar Projects). All employees, workers and associates of SPRNG Energy are required to adhere to this policy.

Policy Objectives and Commitment:

We have established an Information Security Management System for achieving objectives within the company and strive to develop information security controls by:

- *Ensuring that all our business activities are in accordance with applicable laws and regulations*
- *Adopting a systematic approach for identifying and mitigating the risks by implementing cost-effective measures*
- *Providing necessary training for upkeeping the skills in the field of information security and building competency of employees*
- *Establishing a system for monitoring information systems to detect and prevent any unauthorized access of information*
- *Establishing a process of incident management to ensure that all suspected or actual breaches for information security are reported and investigated as a continual improvement*
- *Communicating this policy to all stakeholders by suitable means, followed by an annual review for continual improvement*

We, at Sprng, are committed to practicing, promoting, and providing necessary resources to achieve the best possible renewable energy industry standards towards Cyber Security for all assets.

Authorized by,

CEO
